About Company

GO GREEN is a pioneering company founded by Mr. Aqeel Saifee, based in Dubai, UAE, dedicated to the responsible and innovative management of electronic waste. Specializing in the recycling of waste electrical and electronic equipment, the company stands as a vanguard in sustainable, eco-friendly practices. Our commitment to the environment is exemplified through our comprehensive services, which include E-Waste Recycling, IT Asset Disposal (ITAD), Secure Data Destruction, E-Waste Refining, and Hard Data Destruction.

We ensure that the disposal of IT assets and secure data destruction is carried out meticulously, guaranteeing data privacy and protection. With a dedication to sustainability and technological innovation, GO GREEN spearheads the drive towards a cleaner, greener future, one circuit board at a time.

Each service offered by GO GREEN is meticulously designed to meet the highest industry standards and contribute to the global effort for a sustainable, cleaner future.

WHY GO GREEN

A Data Breach can have far-reaching Consequences, Causing Financial Losses and Affecting an Organization's Operations and Compliance.

DATA BREACHES CAUSED BY MALICIOUS ATTACKS ARE THE MOST COMMON AND EXPENSIVE IN THE MIDDLE EAST.

Malicious Attack

Our Mission

GO GREEN is to revolutionize electronic waste management, promoting sustainability through innovative recycling solutions. We aim to minimize environmental impact, maximize resource recovery, and safeguard data privacy.

Our Vision

GO GREEN is to lead a global shift towards responsible electronic waste management, fostering a circular economy, and inspiring sustainable practices for a cleaner, greener, and technologically advanced future.
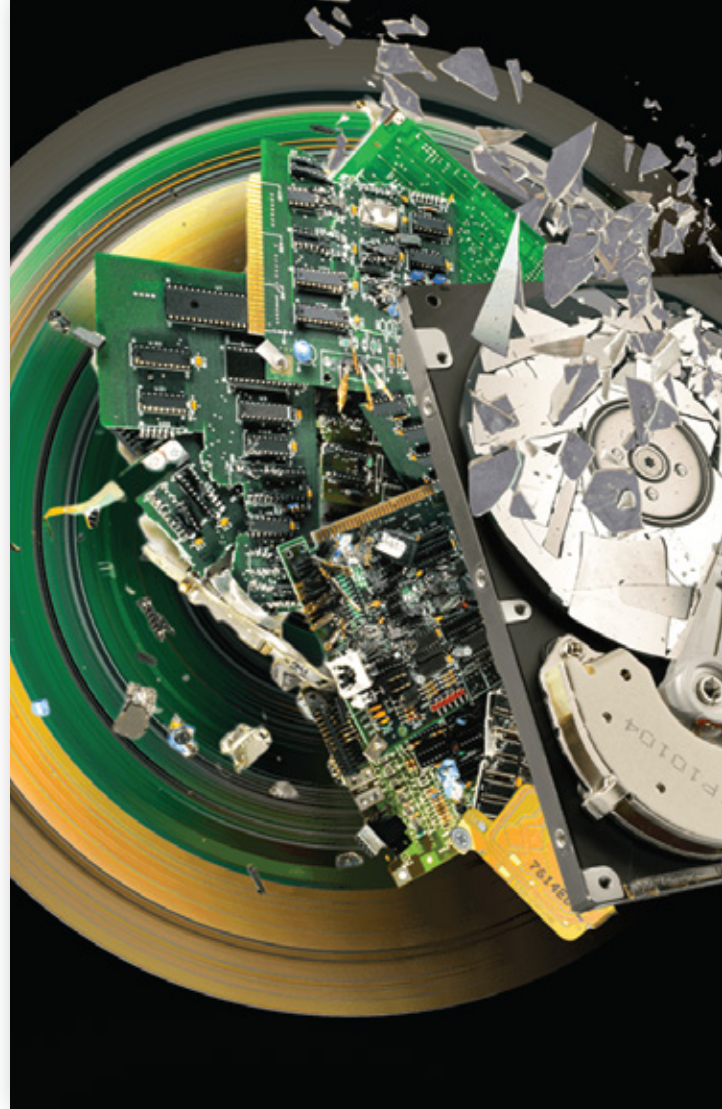

WHY CHOOSE US?

IT Asset Disposal (ITAD) :

GO GREEN's IT Asset Disposal service offers a streamlined and secure method for the removal and disposition of outdated or surplus IT equipment. We ensure a compliant and eco-conscious approach to managing retired assets and safeguarding sensitive data while maximizing value recovery.

Our service encompasses the collection, processing, and environmentally responsible disposal of IT assets, tailored to meet the unique needs of businesses seeking a reliable solution for their IT equipment lifecycle management.

Our Offering on IT Asset disposition includes:

- IT Asset Management
- IT Equipment Removal
- Complete Resale Evaluation Services

E-Waste Recycling :

Electronic waste, or e-waste, poses a significant challenge in today's technological landscape. GO GREEN is at the forefront of sustainable solutions for e-waste, offering a comprehensive recycling service that redefines how discarded electronic devices are managed.

We specialize in the responsible collection and recycling of electronic waste, diverting it from landfills and preventing environmental harm. Our process involves dismantling and segregating e-waste into reusable components, ensuring that valuable materials are recovered and harmful substances are handled safely.

Secure Data Destruction :

At GO GREEN, our Secure Data Destruction service stands as a fortress for safeguarding sensitive information. Utilizing cutting-edge methodologies and stringent protocols, we ensure the complete eradication of data stored across various electronic devices, leaving no trace of recoverable information.

We Provide :

- Insurance to cover cyber-security, errors, and omissions.

- Destruction of all types of media, HDs, and mobile devices.

E-Waste Refining :

At GO GREEN, our E-Waste Refining service represents the next frontier in electronic waste management. We specialize in extracting valuable materials from discarded electronic devices, contributing to a more sustainable and resource-conscious future.

Through innovative techniques and cutting-edge processes, we refine e-waste to recover precious metals, plastics, and other valuable resources, reducing the need for new raw materials and minimizing the environmental impact of resource extraction.

Refining precious metals is a multi-step process that involves:

- Melting The Metals
- Separating The Metals
- Casting The Metals Into Ingots
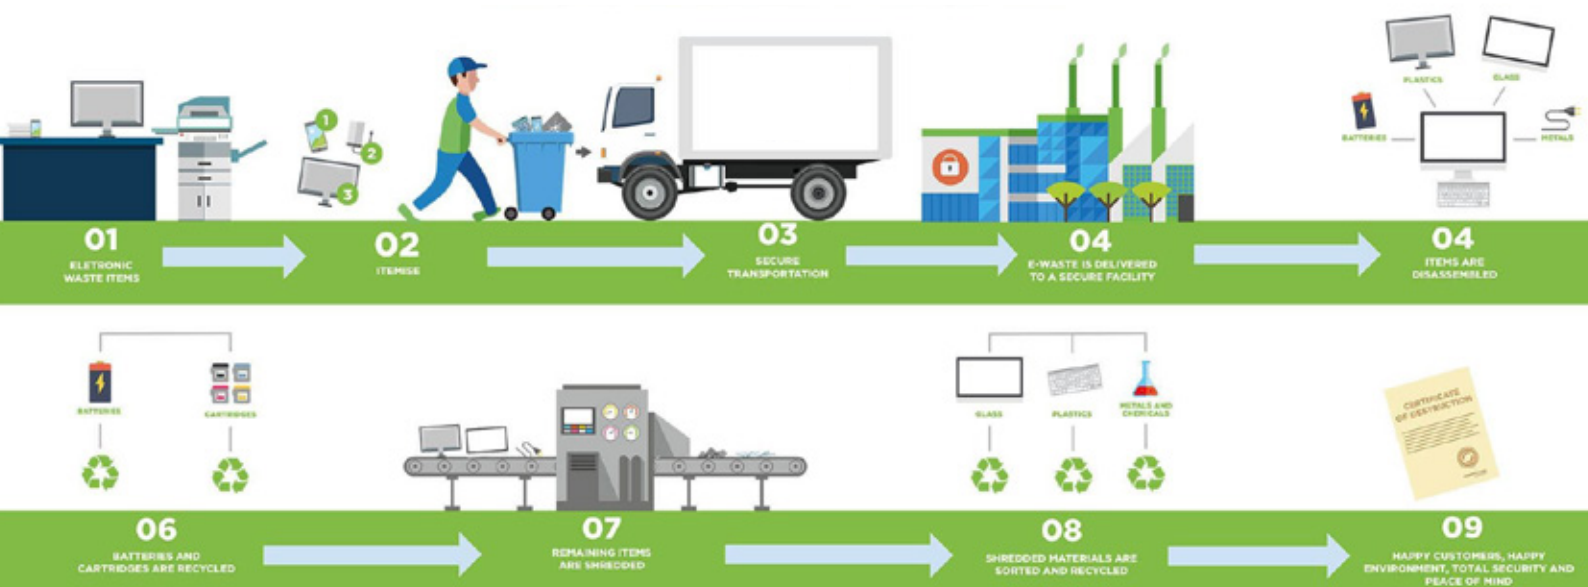

Hard Data Destruction :

At GO GREEN, our Hard Data Destruction service ensures the complete eradication of data stored on hard drives and other devices, maintaining the utmost confidentiality and security. Utilizing cutting-edge methodologies and certified procedures, we guarantee that all data is irreversibly destroyed, leaving no potential for recovery.

Our meticulous process covers a wide range of devices, including hard drives, solid-state drives, and other media, providing businesses and individuals with a trusted solution for data disposal that complies with the highest security standards.

By choosing GO GREEN, you're not just selecting a service; you're joining a movement towards a cleaner, greener future. We're dedicated to making a positive impact on the environment while ensuring your data security and the responsible management of electronic waste.

The eWaste Process

| 01 ELECTRONIC WASTE ITEMS | 02 ITEMISE | 03 SECURE TRANSPORTATION | 04 E-WASTE IS DELIVERED TO A SECURE FACILITY | 04 ITEMS ARE DISASSEMBLED |

| 06 BATTERIES AND CARTRIDGES ARE RECYCLED | 07 REMAINING ITEMS ARE SHREDDED | 08 SHREDDED MATERIALS ARE SORTED AND RECYCLED | 09 HAPPY CUSTOMERS, HAPPY ENVIRONMENT, TOTAL SECURITY AND PEACE OF MIND |

We are Certified by :

We are pleased to inform you that GO GREEN is certified by Dubai Municipality.

بلدية دبي
DUBAI MUNICIPALITY

Every year, we issue you with a Certificate of Environmental Stewardship stating your organization's environmental contribution as a result of partnership with Go Green.

Benefits To Environment

Reduced Landfill Impact:

By recycling electronic waste, we divert materials from landfills, minimizing the environmental impact and preventing hazardous substances from leaching into the soil and water.

Resource Conservation:

Through E-Waste Refining, we recover valuable materials from discarded electronics, reducing the need for new raw materials and promoting resource conservation.

Energy Efficiency:

Our processes focus on energy-efficient methods, contributing to a reduction in overall energy consumption and lowering the carbon footprint associated with electronic waste management.

Circular Economy Contribution:

GO GREEN's approach supports a circular economy, where materials from e-waste find new life in manufacturing processes, fostering a sustainable and regenerative system.

By choosing GO GREEN, you actively participate in mitigating environmental harm and promoting responsible electronic waste management practices.
